

VISHAKHA BHATTACHARJEE

Senior Business Intelligence Engineer | Analytics Engineering | Product Analytics
Los Angeles, CA · Open to Remote | (646) 552-1125 | vbhatta1892@gmail.com | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

Senior BI & Analytics Engineer with 10+ years of experience building data pipelines, BI platforms, and analytics solutions that drive measurable business outcomes across e-commerce, supply chain, and media domains. Combines deep technical expertise in data engineering and BI development with strong business acumen, translating complex data into actionable insights that shape decisions at scale. Experienced in leading and mentoring engineering teams, driving cross-functional alignment, and applying GenAI and agentic automation to reduce manual overhead and accelerate operations.

WORK EXPERIENCE

Amazon

Los Angeles, CA

Business Intelligence Engineer II, Prime Video Partner Experience

Jul 2025 – Present

- ▶ Partnered with Product Management to close a gap in guide engagement visibility, where lack of tracking was driving irrelevant contact cases and poor adoption; spearheaded end-to-end Pendo analytics strategy across engineering and product teams, defining feature tracking taxonomy and leading dashboard development, resulting in a 30% increase in feature adoption, a 10-point NPS improvement, and actionable signals to optimize guide effectiveness.
- ▶ Self-initiated and built agentic workflows to autonomously triage on-call job failures, query system status, and execute corrective actions, eliminating ~10 hrs/week of manual effort; additionally engineered a knowledge base-powered query automation system for business tickets, significantly reducing incident response times.
- ▶ Partnered with Product Management as an analytics advisor to define engagement metrics and establish the 2026 goal framework for Merchandising, translating business objectives into measurable KPIs to support a partner-facing merchandising tool and drive goal setting across teams.
- ▶ Architecting an end-to-end partner analytics platform in collaboration with engineering and product, authoring high-granularity minute-by-minute viewership queries in Athena, defining the semantic layer via Cube.yml, and co-designing metric frameworks and visualizations that will enable partners to drive decisions on ad placement strategy and content quality; platform currently in development and pending launch.

Business Intelligence Engineer II, Global Supply Fulfillment Amazon Grocery

Jul 2023 – Jun 2025

- ▶ Led a cross-functional initiative with instock and supply chain managers to diagnose DC out-of-stock failures impacting downstream instock rates; defined root cause taxonomy, architected the data pipeline, and guided engineering through implementation, reducing DC-driven instock misses by ~1.5% within 2 months across a fulfillment network responsible for 40–50% of total downstream stock.
- ▶ Owned end-to-end development of a rule-based demand analytics solution, partnering with Product and Instock Managers to map buying system workflows and delivering dynamic forecasting capabilities that drove a 2% improvement in instock rate and a 4% reduction in wastage across grocery operations.
- ▶ Self-initiated a GenAI-powered anomaly detection solution for Weekly Business Reviews, engineering training datasets and prompt frameworks in collaboration with data engineering, automatically surfacing instock metric issues and eliminating 2+ hrs/week of manual analysis.
- ▶ As business area owner, partnered with Product Management to architect a supply chain deviation tracing framework, analyzing complex buying workflow changes to surface root causes, cutting troubleshooting time by 10+ hrs/week and enabling targeted, data-driven resource allocation.
- ▶ Mentored junior BI engineers and new hires across technical delivery, project scoping, and stakeholder communication, accelerating onboarding and ensuring consistent, high-quality project execution across the team.

Business Intelligence Engineer I, Global Supply Fulfillment Amazon Grocery

May 2021 – Jul 2023

- ▶ Built end-to-end data pipelines and dashboards to identify and reduce inventory-driven order cancellations across Europe and North America, driving cancellation rates from ~9% to ~3% and enabling ~\$2MM in savings.
- ▶ Developed rule-based defect identification models and custom QuickSight analytics tools in consultation with business stakeholders to optimize DC operations, SKU placement, labor distribution, and temperature tracking, driving ~25% DPMO reduction and enabling ~\$325M in cost savings across North America.

Tech Mahindra Ltd.

Kolkata, India

Senior Business Intelligence Engineer

Oct 2014 – Jul 2019

- ▶ Led a team of 4 to architect ETL processes and a reporting framework for an OLTP telecom system supporting KPIs for 30M+ customers across South Africa, leveraging ODI, SQL, and Power BI to deliver scalable, production-grade BI infrastructure.
- ▶ Spearheaded data model consolidation from Hyperion to OBIEE, unifying reporting architecture and reducing the report catalog from 1,200 to 400 while improving system performance and data quality.

SKILLS

Programming: SQL, Python, Spark

Cloud & Data Platforms: AWS (S3, Glue, Athena), Redshift, ClickHouse

BI & Visualization: Amazon QuickSight, Tableau, Power BI, Pendo, OBIEE, Hive, MS Excel

Semantic & Analytics Layer: Cube.js / Cube.yml

GenAI & Automation: LLM Prompt Engineering, Kiro, QuickSight Workflows, Agentic Workflow Automation

Core Competencies: Product Analytics, ETL Development, Data Pipeline Architecture, Statistical Modeling, Business Intelligence, A/B Testing, Cross-Functional Collaboration

EDUCATION

Columbia University

New York, NY

M.S. in Business Analytics | GPA: 3.37

Dec 2020

Teaching Assistant — Databases for Business Analytics & Introduction to Programming using Python

Dr. B.C. Roy Engineering College

Durgapur, India

B. Tech in Electronics and Instrumentation | GPA: 3.65

Jul 2014
